SAMPLE STUDENT WORK - LINEAR EQUATIONS

Practice submission - show each step and check the final answer

Name: _____ Date: _____

1. 3x + 5 = 26; 3x = 21; x = 7.

2. 5(2y - 3) = 35; 10y - 15 = 35; 10y = 50; y = 4.

3. 2a = 16; a = 8.

4. (3x - 2x) + (4 + 7) = x + 11.

5. 8m - 12.

6. 6(x + 3).

7. 2x + 5 = 13; x = 4.

8. Let the integers be n and n + 1. 2n + 1 = 35; they are 17 and 18.

9. Let width be w. 2(w + w + 3) = 30; w = 6 cm, length = 9 cm.

10. (3/4)n + 2 = 17; n = 20.
